PORTFOLIO

long0423.github.io/Portfolio

CORE EXPERTISE

AI & Product Design

Human–AI interaction
Explainability & feedback loops
GenAI & Agent workflows
AI adoption strategy
UX architecture

UX/UI Design

System mapping
Prototyping
Data visualization
Usability testing
Design system integration

Development & Prototyping

Figma-to-code workflow
HTML/CSS/JS
React/Vue
Rapid prototyping
Design systems

AI & Design Tools

Figma
Cursor
GPT-5
Framer
Midjourney
Notion

EDUCATION/CERTIFICATE

Monash University

Master of Information Technology
(Jul 2015 - May 2017)

DeepLearning.AI

Generative AI with LLM
(Sep 2024)

Google & Microsoft

UX Design Specialization
(Aug - Sep 2024)

SUMMARY

AI Product Designer with 8+ years of experience creating human-centered, explainable AI products. At PwC's AI Centre of Excellence, I lead the design of GenAI and AI Agent experiences, turning complex LLM and data systems into intuitive, trusted interactions. Blending UX strategy, interaction design, and front-end fluency, I design AI experiences people trust, enjoy, and rely on - making AI more human, and humans more capable.

WORK EXPERIENCE

UX/UI & AI Product Design Lead

PwC Australia - AI Centre of Excellence *Aug 2020 - Present*

- Led the design of PwC's AI ecosystem — AI at PwC, Regulatory Pathfinder, AgentOS, and Write — shaping enterprise-scale GenAI and AI Agent adoption across the firm.
- Designed GenAI and Agent interaction models enabling task delegation, contextual reasoning, and explainable feedback, improving workflow efficiency by 30–40%.
- Redesigned design system for the AI ecosystem, that unifies the inconsistency of components and look and feel across multiple AI products and establish the design foundation for future products.
- Pioneered AI-driven proposal workflows, combining prompt chaining and retrieval logic to reduce RFP drafting time by 60% while ensuring compliance and brand alignment.
- Defined explainability frameworks and trust indicators in partnership with data scientists and engineers, strengthening model transparency and user confidence.
- Mentored cross-functional teams on human–AI collaboration and design systems, embedding reusable AI patterns across PwC's AI product suite.

UX/UI Bootcamp Tutor

Monash University *(Part-time) May 2022 - Nov 2022*

- Delivered hands-on UX/UI design training integrating research, prototyping, and portfolio strategy.
- Achieved a 95% satisfaction rate, mentoring students to apply design thinking and industry best practices.

Front End Developer & Product Designer

Desert Software *Nov 2017 - Aug 2020*

- Led design and implementation of multi-platform products, including a rebrand and e-commerce redesign that boosted conversions by 50%.
- Built scalable UI systems and contributed to React-based front-end development.

Web Developer & UX/UI Designer

Umbrella Dementia Cafes *May 2017 - Oct 2017*

- Developed responsive web and mobile applications for dementia support, improving accessibility and engagement.

Web Developer & UX/UI Designer

Shengxiao Machinery *Sep 2016 - Mar 2017*

- Built and optimized responsive company websites, improving design-to-development workflow efficiency by 20%.
